INSIDE AEROTALALAY®

COMFORT & VENTILATION LAYER

NOOMA® AERO-ELASTIC FOAM

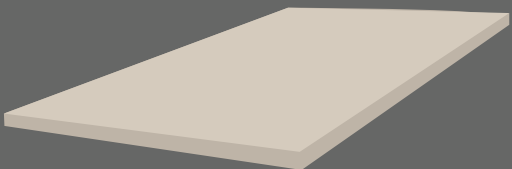

New comfort material developed exclusively by us together with INOAC, leading Japan company in foam making. NOOMA® is improvement of memory foam. It is firmer, less sinking, and does not alter softness even when room temperature changes. NOOMA® creates soft cushioning feel, embracing your sensitive areas such as shoulder joints and hip.

SUPPORT & ALIGNMENT LAYER

VITA TALALAY®

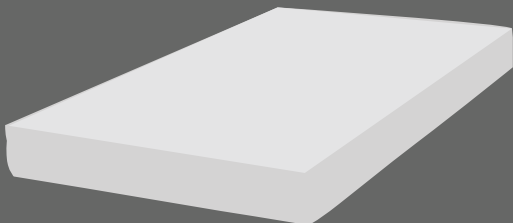

VITA Talalay® latex is comfort material that surpasses all other latex in softness, supportability, and ventilation. Its open round cell structure makes it perfect for whole body support as it is highly adaptive to weight pressure and quick to respond to body shapes making sure that body is in good alignment.

BODY WEIGHT ABSORPTION LAYER

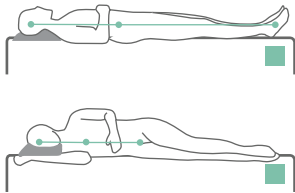

HI-DENSITY CORE

Core takes up your body weight and the weight of all the layers on top of it. You may not feel the core when you sleep but the core plays important role. We use hi-density foam core that gives mattresses unwavering stability and satisfying firmness.

SPINE ALIGNMENT

Mr.Big mattress takes care of all the curviness of your body and put you in good alignment. The firm support and soft cushioning feel is a good combination of ergonomic comfort

SMOOTH NIGHT

No shake ever wakes you again. Mr.Big mattress eliminates motion transfer so you won't be disturbed by the movement of your sleeping partner.

ADJUSTABLE

It works with your adjustable bed

TOP-NOTCH MATERIAL

We make sure to bring out the best feels and benefits of our mattress material. When the right combination of material puts together by ergonomic design and fine finishing, good sleep is happening.

NOTE FROM FOUNDER

I am a physical therapist and I love sleeping. When I design a mattress, I focus first on comfort. You need to feel the comfort as you unload your day onto it. Then, I work on ergonomic support material that ensures good spine alignment, and pressure relief. I hope this mattress makes you sleep healthier and wake up fresh everyday.
